Business Analyst Assistant

As an Assistant Analyst, I conducted analyses in BigQuery, supported business process automation, and contributed to report development. I also actively participated in a CRM data quality improvement project, collaborating closely with the sales department to ensure data consistency and reliability for analyses and business decisions. Additionally, I enhanced my skills in Kissflow, a tool for designing and optimizing company processes.

9 mies.

Business Intelligence Intern

During my internship, I gained experience working with data and Business Intelligence tools. I created and developed reports in Power BI, integrated and validated data from various sources, and wrote SQL queries in BigQuery to prepare data for visualization. This allowed me to strengthen my skills in data analysis, process automation, and working with SQL, BigQuery, Power BI, and Google Sheets.

1 mies.

Data & AI Intern

My main tasks during the internship included supporting analyses and preparing project documentation. During this time, I gained experience working with BigQuery, learned the basics of SQL and Looker, and developed skills in data forecasting and using AI-based tools, including Vertex AI.
